

Name: Aarti Suranje

Grade: Senior Consultant

Educational qualifications

B.E. (I.T) : Vivekanand Education Society's Institute Of Technology (VESIT), Mumbai University

Professional qualifications

- Infosys Ltd, Technology Lead, 2017 to Present
 - TruGlobal Software Pvt Ltd. , Sr Technical Consultant, 2015 to 2017
 - IGATE , Technology Lead, 2013 to 2015
 - Arrow Electronics India Pvt Ltd. ERP Application Developer, 2012 to 2013
 - Infotrack System Pvt. Ltd. , 2009-2012
-

Certifications/Trainings

- Oracle Cloud HCM Training

Profile brief

Total 12+ Years of experience in IT Organization :-

- 10 Years of experience as Technical developer
- 2 Years of experience as Oracle Integrated Cloud(ICS) developer.

Core strengths include:

- Developing and Managing project delivery for Domestic Oracle cloud Implementation/Enhancement / Support projects.
- Experience in creating an ICS connection using adapter like REST, SOAP, File Adapter, FTP Adapter Etc.
- Experience in Configuring lookups , Handling the repeating elements, Faults/logger and monitoring the integration.
- Experienced in customization, extension & personalization of end user level pages of standard cloud product.
- Worked extensively on Design & Implementation of Third party Integration with Oracle Fusion cloud, for multiple Clients across Industry verticals.
- Responsible for understanding, analysing ,designing & Developing Reports, Interface, Conversion & Extension components of RICE, across modules.
- Technical expertise on HCM cloud module , Procure to Pay Cycle (AP, PO, GL), Order to cash Cycle (INV,AR,GL) Oracle Applications – 11i & R12.
- Involved in extensive development/modification of HCM Extract, OTBI Reports, Bi Report and sandbox.
- Hands on experience on HCM Data Loader (HDL), FBDI and BI Publisher.
- Worked on Oracle 10g reports, XML Publisher Reports, XML Bursting, Alerts, Oracle Form, Oracle Discoverer and Web ADI's.

Key expertise

Technology capabilities

- Programming: SQL, PL/SQL, UNIX (Shell script), Linux.
 - Relational Databases: Oracle 10g/9i/7
 - ERP: Oracle Applications E-Business Suite 11i & R12,Fusion Cloud
 - Productivity Tools: Oracle D2K Kit (6i & 10g), Oracle Workflow Builder, Oracle-BI-Publisher Desktop Integrator, Toad, Data Loader, SQL*Loader, SQL*Plus, Putty, Serena, MS Office Suite, CAWA , FileZila,Winscp, SoapUI, Postman.
 - Platforms: MS Windows 2000/XP/Vista/7, Unix, Linux

Projects in Infosys

Oracle Cloud Finance- GAP

- The Purpose is to automate the and integrate the oracle Fusion modules like AP,AR, PO,GL etc. with different other application.
- Involved in design & Development of integration using the ICS.
- Developed the adhoc report as an when required.
- Integrated OIC with Biztalk REST API's to inbound & outbound fusion Transitions.
- Used Different Functions & operations like string, date, Mathematical integration cloud (lookup values), decode/encode base64 etc. inside the mapper component to perform different logics & validations .
- App Driven Orchestration integrations
 1. **ERP Cloud Adapter** - To integrate the OIC with oracle fusion to perform the transactions FBDI, Schedule ESS jobs and call-back etc.
 2. **ATP Adapter**- To perform the CRUD operations.
 3. **Fusion REST End Points using respective OIC adapter**
 - To Integrate & perform various transaction like Invoice creation/update, credit memo creation/update, Attachment update/delete etc. in oracle fusion.
 - Created Fusion BIP and integrated in ICS using stage file activity to write & Read report output.
- Scheduled Orchestration integration to fusion customer ,customer address master data ,Invoice approval request data via BIP report to Biztalk.
- Used Scope activity & Global Fault handler to handle the runtime integration exceptions.
- Keep Track of integration using the monitoring feature of OIC.

Oracle Cloud Supply Chain- Posti

- The Purpose is to automate the and integrate the oracle Fusion modules like AP,AR, PO,GL etc. with different other application.
 - Involved in design & Development of integration using the ICS.
 - Developed the adhoc report as an when required.
 - Integrated OIC with Biztalk REST API's to inbound & outbound fusion Transitions.
 - Used Different Functions & operations like string, date, Mathematical integration cloud (lookup values), decode/encode base64 etc. inside the mapper component to perform different logics & validations .
 - App Driven Orchestration integrations
 - 1.ERP Cloud Adapter - To integrate the OIC with oracle fusion to perform the transactions FBDI, Schedule ESS jobs and call-back etc.
 2. Fusion REST End Points using respective OIC adapter
 - To Integrate & perform various transaction like Invoice creation/update, credit memo creation/update, Attachment update/delete etc. in oracle fusion.
 - Created Fusion BIP and integrated in ICS using stage file activity to write & Read report output.
 - Scheduled Orchestration integration to fusion customer ,customer address master data ,Supplier, Supplier sites, Invoice approval request data via BIP report to Biztalk.
 - Used Scope activity & Global Fault handler to handle the runtime integration exceptions.

Projects in Infosys

Oracle Cloud HCM Implementation & Customizations – PTC

- Responsible for managing the development as well as the implementation team for phase wise cloud module Implementation.
- Work included assign the object to the team, developed the reports ,page level customization as well as check the Tech feasibility analysis & review solutions.
- Building the reusable assets for client to make the process simple - HDL Error Report.
- Developed the report to track the daily notification execution and process flow transaction. – Process/ Transaction monitoring Report.
- Involved in extensive Development of integration with third party application using the Extract utility.
- Also be the part of data migration team to upload various objects using HDL utility.
- Developed the inbound interface/Extract for client to upload the employee LOP automatically into the cloud application without any manual intervention.
- Arranging functional walk through for tech team.
- Track daily delivery statuses & flag any issues/concerns.
- Perform Internal review & spot checks.

Oracle Cloud HCM Implementation – Client is a leading provider of technology products and services to the travel and transport industry.

- Responsible for to analyse the requirement and provide the scalable solution for the client.
 - Developed the inbound interface/Extract for client to upload the employee LOP automatically into the cloud application without any manual intervention.
 - Configure/Developed the extract into the system to masked the employee email data after the P2T refresh.
 - Also be the part of upgrade team to do the sanity check on the system after the quarterly upgrade.
 - Managing the daily issue/ development tracker.
 - Key role in developing the business point of critical notification.

Experience summary (other than Infosys)

Oracle Apps R12 Implementation & Customizations – Client is engaged in R&D, manufacturing and marketing of fine chemicals for the Pharmaceutical and Agrochemical industries.

- Responsible for Developing the reports, notification and the customization as per the client requirement.
- Work included data upload of employee using the HDL data load utility.
- Raised the SR with oracle and coordinate with network team to configure the Single Sign on.
- QA Reviews, Unit Test & preparation of Deployment documents
- Design the OTBI report as per the client requirement.

Oracle Apps R12 Enhancement & Supports – Manufacturing

- Was responsible for managing the project end-to-end Development and support activities included: supplier, customer migration, Bank data migration for supplier and the customer.
- Developed the financial report as per the business requirement.
- Also worked on form personalization. Extensive experience on creating the package and procedure.
- Write the adhoc query as per the requirement.
- Prepare Status report daily, weekly and monthly basis.

Oracle Apps EBS Payment & Bank Integration with Citibank/ICICI – Finance

- Responsible for design, development & Implementation of Oracle EBS Payment Integration with Citibank/ICICI bank
- Process involved automating the steps to generate formatted payment file from Oracle EBS, PGP encryption & subsequent secure FTP to Citi/ICICI Bank Server.
- Configured a reverse feed program to fetch the transaction details & capture the payment status information in Oracle EBS.
- Also projects include to support the daily issue and enhancement.

Oracle apps Support For Network service Provider

- Worked on setup of custom module.
- Developed and customized various report.
- Work on form personalization.
- Write Adhoc query as per the requirement.
- Worked on development of report with xml bursting.
- Worked on PL/SQL package, procedure and function.
